

Summer 2009 Research Application Chemistry Department

Instructions: If you are interested in doing summer research in the chemistry department, please submit this form to list your top three choices for the faculty member with whom you'd like to work. While you may have learned about individual faculty members' research projects from the 1/28/09 and 2/4/09 lunchbag presentations, you are also encouraged to set up a meeting to talk with any faculty member to find out more details about what kind of work you could do over the summer.

In the list below, #1 should be your first choice. The department will meet as a group to determine student/adviser matchups and will give as many students as possible their first choice, subject to available space in the different groups.

To allow us to make assignments before applications for Science Center funding must be submitted (deadline of Friday, February 20), we need this form **no later than noon, Wednesday, February 11**. Please return your form to Heather McQueen, the Chemistry Administrative Assistant, in the Science Center Office, Burton 115. You'll be notified on Monday of the following week of your "assignment," so that you may fill out your Science Center application to turn in on Friday, February 20.

.....
Name: _____ Class: _____

Choices for faculty research adviser, in order of preference:

1: _____

2: _____

3: _____
