 - ~ GRE/MCAT scores
 - ~ GPA
- Experienced researchers.
- Self-motivated and driven.
- Collaborators and innovators.
- Co-authors on scientific publications or presentations.
- Developing long-term scientific goals.

The NIH Oxford-Cambridge Scholars Program is an accelerated, individualized doctoral training program for outstanding science students committed to biomedical research careers. The program is based on the British system, in which students perform doctoral research without required formal courses other than those students choose to take in relationship to their own interests. Students selected for admission to the program have already developed a passion for science through engagement in summer, job related, or undergraduate research programs.
