0	Introduction	1
1	Fall from Paradise	1
2	Billiards and Broken Geodesics	4
3	An Ancestor of Symplectic Topology	8
1	Twist Maps of the Annulus	11
4	Monotone Twist Maps of the Annulus	11
A	Definitions	11
B	Comments on the Definition	12
C	Twist Maps of the Cylinder	16
5	Generating Functions and Variational Setting	17
A	Generating Functions	17
B	Variational Principle	18
C	Periodic Orbits	20
D	Rotation Numbers	21
6	Examples	21
A	Standard Map	21
B	Elliptic Fixed Points of Area Preserving Maps	23
C	The Frenkel–Kontorova Model	24
D	Billiard Maps	25
7	The Poincaré–Birkhoff Theorem	27
2	The Aubry–Mather Theorem	31
8	Introduction	31
A	Motivation And Statement Of The Theorem	31
B	From The Annulus To The Cylinder	33
9	Cyclically Ordered Sequences And Orbits	34
10	Minimizing Orbits	36
11	CO Orbits Of All Rotation Numbers	40
A	Existence Of CO Periodic Orbits	40
B	Existence of CO Orbits Of Irrational Rotation Numbers	41
12	Aubry-Mather Sets	41

XIV Content

13	Appendix: Cyclically Ordered Sequences and Circle Maps	46
	A Proofs Of Lemmas 9.1 And 9.2	47
	B Dynamics Of Circle Homeomorphisms	49
3	Ghost Circles	53
14	Gradient Flow of the Action	54
	A Definition of the Flow	54
	B Order Properties of the Flow	55
15	The Gradient Flow and the Aubry-Mather Theorem	57
16	Ghost Circles	59
17	Construction of Ghost Circles	63
	A Ghost Circles Through Any Aubry-Mather Sets	63
	B Smooth, Rational Ghost Circles	64
18	Construction of Disjoint Ghost Circles	67
19	Proof of Lemma 18.5	70
20	Proof of Theorem 18.1	73
	A Rational C_ω 's	74
	B Irrational C_ω 's	74
21*	Remarks and Applications	78
	A* Remarks	78
	B Approximate Action-Angle Variables for an Arbitrary Twist Map	79
	C* Partition for Transport	80
	D* An Extension of Aubry's Fundamental Lemma	81
22	Proofs of Monotonicity and of the Sturmian Lemma	82
	A Proof of Strict Monotonicity	82
	B Proof of the Sturmian Lemma	83
4	Symplectic Twist Maps	87
23	Symplectic Twist Maps of $\mathbb{T}^n \times \mathbb{R}^n$	88
	A Definition	88
	B Comments on the Definition	89
	C The Variational Setting	89
24	Examples	91
	A The Generalized Standard Map	91
	B Hamiltonian Systems	92
	C Elliptic Fixed Points	93
25	More on Generating Functions	95
	A Homeomorphism Between Twist Maps and Generating Functions	95
	B Local vs. Global Twist	96
	C Differential of the Map vs. Generating Function	98
26	Symplectic Twist Maps on General Cotangent Bundles of Compact Manifolds	99
	A Definition	99
	B Maps vs. Functions, Revisited	100
	C Examples	101

5	Periodic Orbits for Symplectic Twist Maps of $\mathbb{T}^n \times \mathbb{R}^n$	103
	27 Presentation Of The Results	103
	A Periodic Orbits and Rotation Vectors	103
	B Theorems of Existence of Periodic Orbits	104
	C Comments on the Asymptotic Conditions	105
	D History	106
	28 Finite Dimensional Variational Setting	107
	29 Second Variation and Nondegenerate Periodic Orbits	110
	30 The Coercive Case	112
	31 Asymptotically Linear Systems	114
	32 Ghost Tori	116
	33 Hyperbolicity Vs. Action Minimizers	118
6	Invariant Manifolds	123
	34 The Theory of Kolmogorov–Arnold–Moser	123
	35 Properties of Invariant Tori	127
	A Recurrent Invariant Toric Graphs are Lagrangian	127
	B Orbits on Lagrangian Invariant Tori Are Minimizers	128
	C Birkhoff’s Graph Theorem	129
	D* Aubry-Mather Theorem Via Trimming	132
	E* Generalizations of Birkhoff’s Graph Theorem to Higher Dimensions	133
	36 (Un)Stable Manifolds and Heteroclinic orbits	135
	A (Un)stable Manifolds	135
	B Variational Approach to Heteroclinic Orbits	136
	C Splitting of Separatrices and Poincaré–Melnikov Function	138
	37* Instability, Transport and Diffusion	141
	A* Some Questions About Stability	141
	B* Answer to Question 1: Shadowing of Aubry-Mather Sets	141
	C* Partial Answer to Question 2: Unbounded Orbits	142
	D* Partial Answer to Question 3: Converse KAM Theory	143
7	Hamiltonian Systems vs. Twist Maps	145
	38 Case Study: The Geodesic Flow	146
	A A Few Facts About Riemannian Geometry	146
	B The Geodesic Flow as a Twist Map	149
	C The Method of Broken Geodesics	151
	D The Standard Map on Cotangent Bundles of Hyperbolic Manifolds	152
	39 Decomposition of Hamiltonian Maps into Twist Maps	154
	A Legendre Condition Vs. Twist Condition	154
	B Lagrangian Formulation Of Theorem 39.1	157
	C Global Twist: The Case of the Torus	159
	D Decomposition of Hamiltonian Maps into Twist Maps	162
	40 Return Maps in Hamiltonian Systems	164
	41 Suspension of Symplectic Twist Maps by Hamiltonian Flows	165
	A Suspension with Fiber Convexity	166
	B Suspension without Convexity	170

8	Periodic Orbits for Hamiltonian Systems	173
42	Periodic Orbits in the Cotangent of the n-Torus	174
A	Optical Hamiltonians	174
B	Asymptotically Quadratic Hamiltonians	175
C	Remarks About the Above Results	176
43	Periodic Orbits in General Cotangent Spaces	177
A	The Discrete Variational Setting	178
B	The Isolating Block	179
C	End of Proof of Theorem 43.1	182
D	Periodic Orbits of Different Homotopy Classes	184
44	Linking of Spheres	186
