

Movie Embedding

CSC 105 Handout, 26 April 2006

```
<html>
<head>
<title>JavaScript/QuickTime example</title>
</head>
<body>
<h2>JavaScript/QuickTime example</h2>

<!-- surround the embed tag (most browsers) with the object
      tag used by IE (because they're special) -->
<object classid="clsid:02BF25D5-8C17-4B23-BC80-D3488ABDDC6B"
        id="themovie"
        width="160" height="120"
        codebase="http://www.apple.com/qtactivex/qtplugin.cab">
  <param name="src" VALUE="g/Aargh.mpg"/>
  <param name="autoplay" VALUE="false"/>
  <param name="controller" value="false"/>

  <embed src="g/Aargh.mpg" width="160" height="120"
        name="themovie" autoplay="false" controller="false"
        enablejavascript="true"
        pluginspage="http://www.apple.com/quicktime/download/" />
</object>

<!-- buttons and links to directly access themovie and
      call the quicktime Play() and Stop() methods -->
<form name="theform">
  <input type="button" name="play" value="Play"
    onclick="document.themovie.Play();" />
  <input type="button" name="stop" value="Stop"
    onclick="document.themovie.Stop();" />
</form>
<p><a href="javascript:document.themovie.Play();">play</a>
<a href="javascript:document.themovie.Stop();">stop</a></p>
